PROFESSIONAL SUMMARY

HR Technology Specialist and HRBP with 4+ years of hands-on experience modernising enterprise HR platforms at Raymond Lifestyle Ltd. I thrive at the intersection of people strategy and digital execution, leading end-to-end HRIS implementation, system integrations, and process automation that make HR operations faster, more accurate, and genuinely employee-friendly. Equally at ease configuring a PMS module, building a real-time analytics dashboard, or working with a project team to solve a complex workforce challenge.

CORE COMPETENCIES

- HRIS & HRMS Administration: End-to-end system implementation, module configuration, and continuous optimisation.
- Digital Employee Lifecycle Management: Recruitment, onboarding, performance, attendance, learning, and exit.
- HR System Integrations & Identity Provisioning: New hire data flows, SSO, and cross-platform connectivity.
- HR Analytics & Dashboards: Translating workforce data into actionable reports and leadership dashboards.
- LMS Operations: SCORM-compliant content deployment and digital learning platform administration.
- Access Control & Data Governance: Role-based permissions, audit management, and HRIS data integrity.
- HR Process Automation: Custom workflow tools using Google Apps Script to eliminate manual inefficiencies.
- Vendor & Stakeholder Management: Leading HR tech vendor relationships and cross-functional IT partnerships.
- HR Policy Development: Co-authoring and updating HR policies to reflect modern workforce and compliance needs.
- Digital HR Transformation: Supporting the shift from paper-based to fully digital, self-service HR ecosystems.

PROFESSIONAL EXPERIENCE

HR Technology Specialist & HR Business Partner | Raymond Lifestyle Ltd., Mumbai | August 2022 - Present

HR Technology & Digital Transformation

- Led the full operational management of the enterprise HRIS, including strategic system reimplementation, module configuration, and continuous platform enhancements.
- Configured and maintained all core HR modules - Recruitment, Onboarding, Performance Management (PMS), Attendance, Learning, and Exit - keeping them tightly aligned with evolving business requirements.
- Served as the primary owner for HRIS access governance, managing role-based permissions, resolving employee system queries, and maintaining data accuracy across the platform.
- Partnered closely with IT to architect HR system integrations, automating new hire identity provisioning and enabling real-time data synchronisation between HR and downstream systems.
- Managed strategic vendor relationships, overseeing platform upgrades, UAT cycles, and the prompt resolution of critical technical issues.
- Built comprehensive HR dashboards and engagement survey tools using digital platforms, giving leadership clear, real-time visibility into workforce health.
- Authored SOPs, system documentation, and user guides, and personally delivered HRIS training sessions to drive platform adoption across the organisation.
- Collaborated with Vendor, Plant HR team to automate attendance capture and PMS budgeting workflows, significantly reducing manual errors.
- Designed and deployed a custom multi-sheet consolidation tool using Google Apps Script, giving management a single, live operational view across fragmented data sources.

- Co-led the HR policy revamp initiative, auditing existing policies and rewriting key frameworks to meet current legal and organisational standards.

HR Business Partnering - Project Teams

- Acted as the embedded HR partner for project teams, aligning workforce processes with project delivery timelines and PMO requirements.
- Coordinated with project managers, sourcing teams, and consultants on workforce planning, hiring pipelines, and contractor onboarding.
- Maintained workforce data for active projects and facilitated performance review cycles to keep project teams focused and accountable.
- Resolved employee relations issues promptly, fostering a compliant and positive work environment even within high-pressure project settings.

Assistant Manager - Learning and Development | Raymond Ltd., Mumbai | December 2021 - August 2022

- Designed and deployed engaging digital learning journeys and onboarding programmes that improved new hire time-to-productivity.
- Led LMS operations, ensuring content was accessible, current, and aligned with the organisation and brand values.
- Created the EMBARK onboarding programme for store owners, bridging brand identity with day-one operational readiness.
- Developed leadership value infographics and retail e-learning modules that made complex ideas visually clear and memorable.

Senior eLearning Executive | Centre for Investment Education and Learning, Mumbai | March 2021 - November 2021

- Built and tested SCORM-compliant digital learning content for multi-platform LMS deployment across financial education programmes.
- Managed external vendors for video and course production, ensuring quality and timely delivery.
- Provided LMS administration support including configuration, troubleshooting, and content publishing.
- Managed backend WordPress operations and supported the creation of client-facing digital proposals.

Senior Interactive Designer | LIDO Learning, Mumbai | September 2020 - March 2021

- Transformed academic content into interactive digital learning experiences optimised for student engagement on the platform.
- Conducted end-to-end QA testing for learning modules, ensuring cross-device compatibility and UI consistency.
- Mentored internal teams on instructional design standards and interactive content delivery best practices.

Interactive Designer | LIDO Learning, Mumbai | September 2019 - August 2020

- Designed interactive modules for K-12 academic and corporate sales training programmes.
- Supported platform updates and tested new features for accuracy, usability, and compatibility.
- Worked with curriculum and tech teams to maintain consistent content delivery standards.

Web Developer and Tester | Freelance | May 2016 - September 2020

- Designed and deployed responsive websites for diverse clients, covering UX layout, SEO, and secure hosting configurations.
- Performed rigorous QA testing across web and mobile platforms, identifying and resolving defects before go-live.
- Executed digital marketing campaigns that measurably improved client online visibility and engagement.

Development & Technical Editor | Packt Publishing, Mumbai | May 2016 - June 2019

- Validated the technical accuracy of developer publications by thoroughly reviewing and executing code samples.
- Coached authors on technical writing standards to ensure clarity, correctness, and audience suitability.

- Managed end-to-end timelines for multiple simultaneous publishing projects, consistently meeting quality benchmarks.

TECHNICAL PROJECTS

- HR Workflow Automation: Built Google Apps Script tools to automate multi-sheet HR tracking, reducing manual effort and eliminating data entry errors.
- Centralised HR Resource Hub: Developed a Google Team Site as a single, searchable source of truth for all HR policies, SOPs, and team tools.
- Bach Flower Remedies Web App: Full-stack ASP.Net and MySQL application for automated product reference and client management.
- Custom Spell-Check Engine: Application that scans documents and flags user-defined terminology, built to support editorial and compliance use cases.
- IoT Prototyping: Hands-on hardware-software experimentation using Raspberry Pi and Arduino for web server hosting and automation projects.

EDUCATION & CERTIFICATIONS

- B.Sc. in Computer Science - University of Mumbai
- Bachelor of Computer Applications (BCA) - YCMOU
- Six Sigma Green Belt | Android Development Certification | VR Application Development Workshop
- CMS Certified Networking Specialist | Computer Networking (Integrated) | Certificate in Computer Applications
